Education

Government Engineering College, Arwal

Bachelor of Technology in Computer Science and Engineering – Data Science

Aug 2023 – May 2027

CGPA: 8.25

S.R.P.S Senior Secondary School, Patna

Senior Secondary (XII) – ISC, PCM

June 2021 – May 2023

Percentage: 70.2%

Technical Skills

Languages: C, C++, Python, JavaScript (ES6+), SQL

Core CS: Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS, Computer Networks

Web Technologies: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, RESTful APIs

Databases & Cloud: MongoDB, MySQL, Google Cloud Platform (GCP) Fundamentals

Developer Tools: Git, GitHub, VS Code, Vercel, Postman, Google Looker Studio

Experience

Frontend Developer Intern — Virtunexa

Remote, India

Feb 2025

- Engineered **10+ reusable, modular UI components** using **React.js** and **Tailwind CSS**, establishing consistent cross-platform UI architecture.
- Integrated asynchronous **RESTful APIs**, reducing data handling overhead and UI render latency by **25%**.
- Maintained strict version control practices using **Git** and **GitHub**, conducting peer reviews and mobile responsive checks.
- Resolved **15+ cross-browser compatibility issues**, boosting application reliability and user experience.

Projects

• ResearchPilot AI

[GitHub](#) [\[Live\]](#)

Next.js | React.js | AI Workflow Integration | Tailwind CSS

- Built an AI-driven research paper analyzer that extracts key insights, summaries, and core methodology from academic PDFs.
- Designed an interactive document workspace featuring query pipelines, markdown rendering, and dark mode UI.
- Optimized server-side rendering (SSR) in **Next.js**, reducing initial load times by **35%**.
- Deployed the production build to **Vercel** with automated CI/CD pipeline integration and continuous uptime.

• Service Connect Pro

[GitHub](#) [\[Live\]](#)

MERN Stack (MongoDB | Express.js | React.js | Node.js)

- Architected a full-stack platform connecting local consumers with verified service professionals.
- Constructed **12+ RESTful API endpoints** in **Express.js** handling user auth, search filters, and booking statuses.
- Designed optimized **MongoDB** schemas with indexing to ensure high-performance query execution.
- Implemented token-based session authentication and robust validation for end-to-end data security.

Achievements

- 3× Google Student Ambassador:** Appointed to lead tech initiatives, driving cloud and web learning for 500+ students.
- Google Cloud Arcade Legend Tier:** Reached elite tier status through verified milestones in cloud architecture, IAM, and DevOps.
- Google Cloud Arcade Facilitator:** Mentored peer cohorts through cloud computing tracks, labs, and hands-on deployments.
- GeeksforGeeks Campus Mantri:** Spearheaded campus-wide competitive programming contests and DSA training cohorts.
- GDG Co-Lead:** Organized technical webinars, developer meetups, and open-source contribution drives.

Positions of Responsibility

Google Cloud Arcade Facilitator

Jul 2025 – Sep 2025

Google Cloud Community Cohort

- Guided an active cohort of **1,000+ students** across cloud deployment labs, resolving 100+ technical queries.
- Tracked progress metrics, organized Q&A review sessions, and trained members in cloud infrastructure fundamentals.
